ICONTEK

[Mattress Inspection Conveyor]

[MachineDescription]

ICONTEK Inspection Conveyor

Makes inspecting mattresses easy, quick and safe with lifting arms to raise the mattress by 90 degrees in order to flip it over with minimal manpower or labour.

We offer a comprehensive project management service supplying a full factory visualisation, tailored electrical controls, and bespoke machines to achieve the best possible solutions for all industries.

MATTRESSTEK are focused on high performance, only using leading suppliers and high-quality components to reduce downtime and improve efficiency.

MATTRESSTEK machines are designed to be maintenance friendly. Mechanical and electrical assemblies can be easily replaced and simply plugged in, reducing the need for an electrical/mechanical technician.

All MATTRESSTEK machines are designed, manufactured and built at our premises in the UK, by our team of experienced fabricators and machine builders.

Prior to shipment all machines are meticulously tested and trialled on customer samples.
