

CITEK

[Belt-Driven Indexing Conveyor]

[MachineDescription]

CITek Belt-Driven Indexing Conveyor

A straight line belt driven conveyor (2m conveyor belt) with the ability to feed a mattress onto any machine to remove the need to manual handling the mattress, it bridges (index) a gap of 500mm to allow a walk way between a line of conveyors or between the index conveyor and a machine to allow room around a machine for the operator.

We offer a comprehensive project management service supplying a full factory visualisation, tailored electrical controls, and bespoke machines to achieve the best possible solutions for all industries.

MATTRESSTEK are focused on high performance, only using leading suppliers and high-quality components to reduce downtime and improve efficiency.

MATTRESSTEK machines are designed to be maintenance friendly. Mechanical and electrical assemblies can be easily replaced and simply plugged in, reducing the need for an electrical/mechanical technician.

All MATTRESSTEK machines are designed, manufactured and built at our premises in the UK, by our team of experienced fabricators and machine builders.

Prior to shipment all machines are meticulously tested and trialled on customer samples.

For more information on any of our products please call 01282 479922 email us at: sales@mattresstek.co.uk or visit us at: www.mattresstek.co.uk
