

# SCTEK

[Mattress Sock Closing Machine]

## [ Machine Description ]

SCTEK - Sock Closing machine.

Designed to effortlessly close fire retardant 'SOCKS' for foam bed units. Can be integrated into any conveyor line after the mattress Stuffer (STFTEK).

The machine has been designed to work either in line with a mattress conveyor line or perpendicular to the line where you can add as many sewers to the line to keep up with demand.

Strong, robust, quality UK manufactured machine, that is fully CE marked and can be integrated simply into a new or existing conveyor line.

MATTRESSTEK machines are designed to be maintenance friendly. Mechanical and electrical assemblies can be easily replaced and simply plugged in, reducing the need for an electrical/mechanical technician.

All MATTRESSTEK machines are designed, manufactured and built at our premises in the UK, by our team of experienced fabricators and machine builders.

Prior to shipment all machines are meticulously tested and trialed on customer samples.

### [Machine Features]

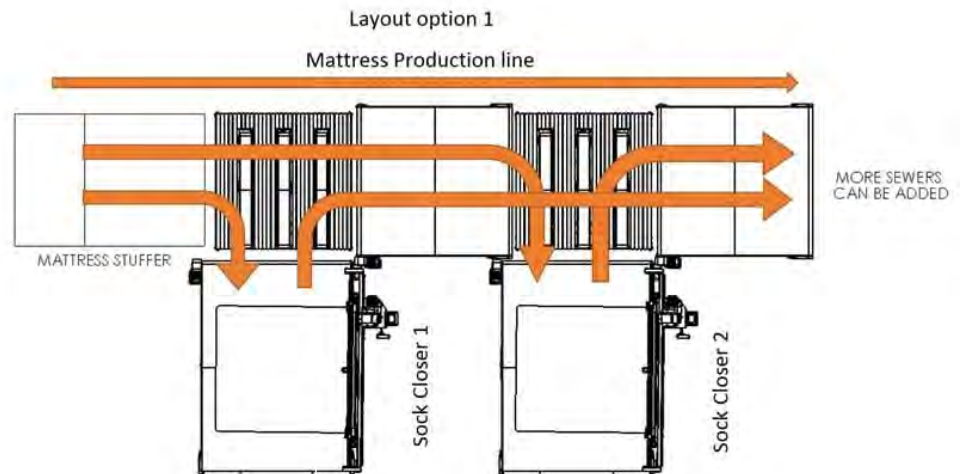

- Mattress handling size up to 2.3 Mtr x 2.3 Mtr (90" x 90").
- Capable of sewing any length of mattress.
- Designed to work either in the mattress production line or perpendicular to the line where you could have multiple sewers to speed up production and work safer.
- High quality juki sewing head.
- Ergonomic controls with a knee pad controller so the operator can have both hands on the product while being able to slow down, stop and restart sewing with just their knee.
- High quality touch screen.
- Can be integrated into a MattresTek mattress production line or any existing conveyor line.
- Full factory automation project management service available.
- Full conveyor layout visualisation of your production line available, to truly view and understand the conveyor line proposal.
- Full electrical control circuit project management.
- High quality motor drive.
- Fully CE certified
