

TAMPTEK

[Mattress Tamp Machine]

Machine Description

TAMPTEK Mattress Tamp machine

Once all filling components of the mattress are layered, the TampTek presses all layers together to secure them and allow the glue to ensure that they are held together securely.

At MATTRESSTEK we have developed a complete range of machinery to fully automate your production process. From inline belt driven conveyors to 90 degree turners.

We offer a comprehensive project management service supplying a full factory visualisation tailored electrical controls and bespoke machines to achieve the best possible solutions for all industries.

MATTRESSTEK are focused on high performance, only using leading suppliers and high-quality components to reduce downtime and improve efficiency.

MATTRESSTEK machines are designed to be maintenance friendly. Mechanical and electrical assemblies can be easily replaced and simply plugged in, reducing the need for an electrical/mechanical technician.

All MATTRESSTEK machines are designed, manufactured and built at our premises in the UK, by our team of experienced fabricators and machine builders.

Prior to shipment all machines are meticulously tested and trialled on customer samples.

For more information on any of our products please call **01282 479922** email us at: sales@mattresstek.co.uk or visit us at: www.mattresstek.co.uk
